### DETAILED ACTION

1. Claims 1-69 have been canceled. Claims 70-135 have been added and are pending.

#### *Election/Restrictions*

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 70-86, drawn to method of performing cycloaddition, classified in class 560, subclass 1+.
  - II. Claims 87-95, drawn to reaction mixture, classified in class 585, subclass 361.
  - III. Claims 96-118, drawn to method of performing asymmetric catalytic reaction, classified in class various, subclass various.
  - IV. Claims 119-134, drawn to reaction mixture, classified in class 585, subclass 361.
  - V. Claim 135, drawn to method of performing a hetero-Diels-Alder reaction, classified in class 585,540,544,546,548,549, subclass various.
3. The inventions are distinct, each from the other because of the following reasons:

Each of inventions I, III, and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions involve different reactants, reaction mechanisms to produce different products.

Each of group II and IV are distinct and independent from each of Groups I, III, V because they are directed to different statutory classes of invention and, the practice of one of Inventions II or III or IV would not result in the practice of the other Invention, i.e., a composition of matter (reaction mixture) is not a process that prepares *per se* the compounds.

Group II is distinct and independent from Group IV. In this instance, the compounds of the compositions differ structurally, and the components of the compositions differ.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1625

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
